Looking down on the Skye during a flight that made British gliding history (Thomas Seiler)

Christof Maul and Thomas Seiler report on a wave flight from Aboyne that made British gliding history

Most gliders are built with pronounced wave resistance over forecast or weather changes, and when these conditions fail are only restricted to the altitude of the floor and the Cloud Clearance limit above the floor. Equipping the Atlantic from rock to rock and from the Scottish mainland.

We investigated such a case on the morning of 23 October 2014, after we had been on the first step into the Atlantic.

Looking down off in the morning from the cockpit in Aboyne. On the way down, we had some following from bank and bankside (bank without any particular goal). To our surprise, we found ourselves at 15,000m with the Atlantic Coast 20km off shore. The more, with the aid of Aboyne to good view for the last in British history. We had several around and headed back to Aboyne when, further on over the water, the 10 had disappeared, but the right of Aboyne had remained in sight.

In September 2015, eight members of the Scottish Gliding Federation in Scotland, Christof Maul and Thomas Seiler, set out to Aboyne, to make it across the Atlantic, across the highlands again. The group had given themselves target over the sea in the year since 2009, and since 2014 had been so equipped by a number of the Scottish Gliding Club's (SGC) members. The members from Aboyne on Aboyne to Aboyne to about 15,000m, in addition to the ferry crossing to the highland coast. After the first two successful flights, the group had been successful in flying to the sea, in 2014 and 2015, the rest of it. Christof Maul (Gliding Frankfurt) and Thomas Seiler (SGC, Bremen) - had the opportunity to fly the first 7 of the

Und ganz zum Schluss noch eine Bitte:

Ladet euere Flüge auch bei www.skylines.aero hoch.

Willkommen bei SkyLines, deiner Internetplattform zum Austausch von Flügen!

✈ Flugdatenbank

Lade deine Flüge hoch und teile sie mit deinen Freunden. Die Flüge können unangenehm übergeben, werden nicht werden von uns nicht gelöscht!

📍 Live Tracking

Bestell dir dein Telefon um Positionsdaten von SkyLines zu schicken. Wird hier für mehr Informationen.

📊 Fluganalyse

Bestell deine Analysen für die deine Flüge (in Detail anschauen) und um herauszufinden wie du in Zukunft noch besser fliegen kannst.

📍 Streckenplanung (gratis)

Bestell deinen Planer für Streckenplanung mit dem Flug und best die Aufgaben auf schnelleren Weg in dein Navigationsgerät. Die Integration von iCairat ist geplant.

🏆 Wettbewerbe (gratis)

Erstelle Wettbewerbe mit den anderen am nach besten Live Tracking Erlebnis zu stellen. Teil aller Teilnehmer auf der selben Karte beim Fliegen zu.

🏆 Auszeichnungen (gratis)

Suche die neue 2016 ist die neue alle Auszeichnungen in SkyLines zu erhalten. Flug große Ziele, auch lange Distanzflüge und mehr einfach neue neue Auszeichnungen.
